

# The Capricorn gutter downspout Q3

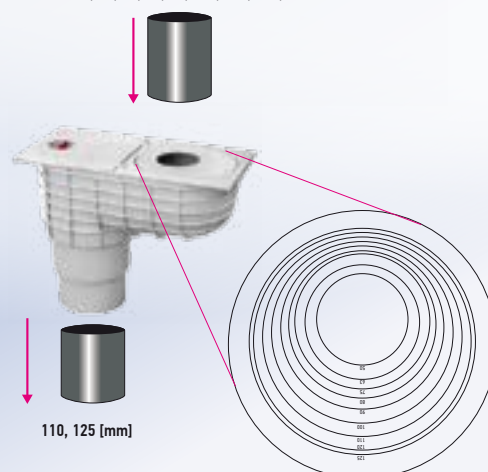

The gutter downspout is an element connecting rain water pipes draining water from gutters with rainwater drainage system.

The Capricorn gutter downspout is equipped with custom-designed elements forming the **Q3** system:

Functional  
pipe connections

50, 63, 75, 80, 90, 100, 110, 120, 125 [mm]

110, 125 [mm]

Functional pipe connections Ingenious universal coupling for 9 sizes of rainwater gutter pipe

Eccentric coupling for gutter rainwater pipe, prepared for easy cut and fit with 9 pipe sizes, adjustable in two directions.

Specific water flow capacity at 3.6l/s

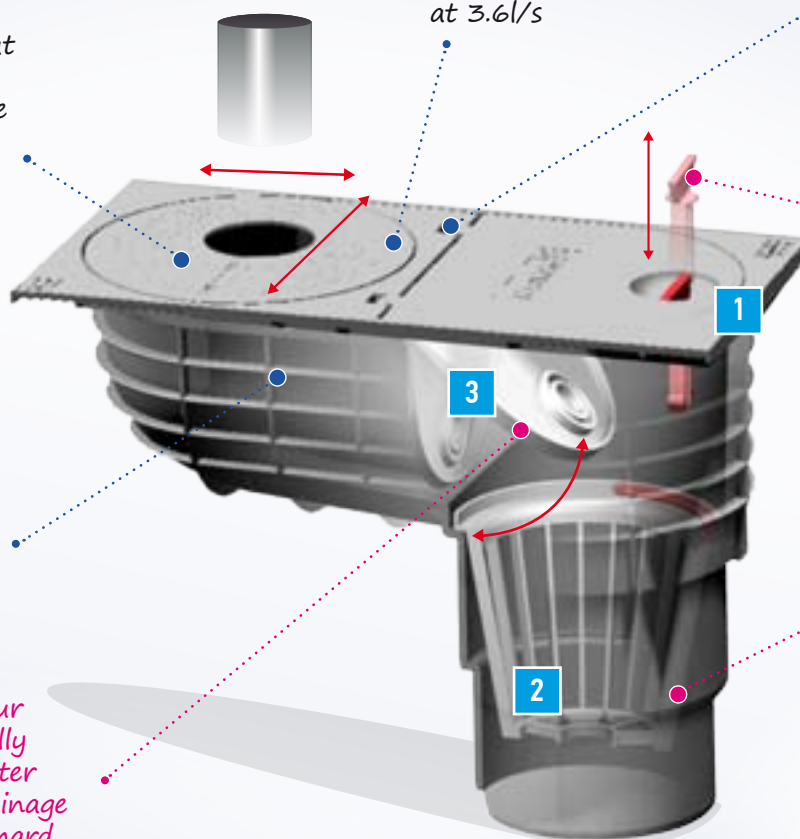

Resistant to hard conditions – catch closing, made of polypropylene with UV stabiliser

Innovative, pull-apart lug for convenient cover opening

Ribbing of its body ensures high resistance to loads occurring during and after assembly.

Automatic odour barrier, gradually draining rainwater into rainwater drainage system, made of hard ABS thermoplastic.

Removable leaf basket accumulating debris with handy lug

# Q3

The Capricorn gutter downspout is equipped with custom-designed elements forming the **Q3** system:

- 1** innovative, pull-apart lug for convenient cover opening,
- 2** removable leaf basket accumulating debris,
- 3** automatic odour barrier, facilitating rainwater flow into rainwater drainage system.

Code	Colour
