## HIGH QUALITY ELECTRIC WATER HEATER

The perfect choice  
for safe  
and reliable  
water heating.

**100%  
CHECKED**

VALENCIA

The tank is manufactured using thick and high-grade steel. Its surface is processed by a special titanium glasslining treatment that guarantees a lasting barrier against rust and corrosion.

The oversized anode releases magnesium particles which prevents electrolysis, and consequently guarantees lasting protection for the inner tank.

The steel outer case is coated with epoxy powders, creating a durable, long lasting finish.

Thermal insulation, performed by high density CFC-free polyurethane foam, which conforms to international environmental protection rules, provides a considerable energy saving and controls heat dispersion.

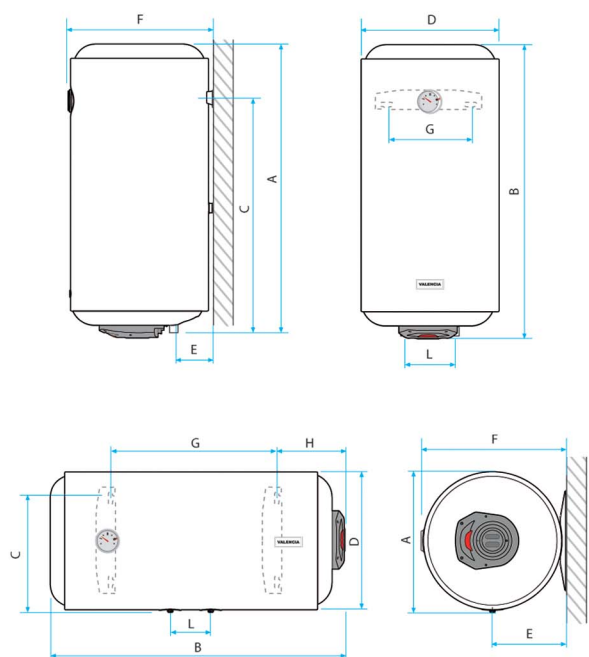

Conforming to Highest Quality Standards  
obtaining International Quality Accreditation Certificates

# VALENCIA

The heating element, the anode and the thermostat are mounted on a large 5-bolt flange (Ø 70mm). This allows quick access for easy maintenance.

All models are equipped with high performance copper heating element that ensures fast heating and low energy consumption.

Valencia water heaters are designed and manufactured with a commitment to preserve the environment so that each appliance parts are recyclable.

One thermostat controls water temperature and automatically cuts off power in case of overheating. The other thermostat operates in case of failure of the main one.

These appliances are equipped with a safety valve, rated at 7,5 bars, ensuring maximum safety in case of excessive pressure inside the boiler.

Valencia Electric Water Heaters are subject to 100% Quality Check with 3 Years Warranty.
